

Confidant MT™

Confidant MT™ is a stylish cylindrical latch solution. It combines modern design and expert engineering to present a multifaceted security option that fits seamlessly into any back-of-house security blueprint to provide upgraded life safety and property security. It seamlessly integrates with existing SAFLOK installations.

Incorporating select features of SAFLOK's MT™, Confidant MT is compatible with the Windows-based System 6000™ and the stand-alone DeskLinc™ front desk operating system. As a multi-technology lock, it conveniently reads all three types of keycard media—smart, memory, and magstripe cards.

The Confidant MT's bolt-on feature provides the ideal solution for properties wanting to upgrade from mechanical to electronic locks but not wanting to replace doors or cut new mortises.

Features

Confidant MT showcases a broad spectrum of features that make it a functional, flexible, and "in-demand" solution.

Easy Installation

Confidant MT makes it easy and economical to upgrade electronic locks throughout the back of house. It requires a standard cylindrical latch prep.

Non-volatile Flash memory

As common to SAFLOK multi-technology locks, Confidant MT employs non-volatile Flash memory. It can store in excess of 5,900 entries. Flash memory becomes especially useful in back-of-house applications, where employee tracking is crucial.

Future Upgradability

With the capability of this FLASH memory, property managers can upload any new software introduced by SAFLOK without changing or removing any hardware.

Custom ASIC Microprocessor

At the heart of Confidant MT is SAFLOK's proprietary custom ASIC microprocessor, which uses an Intel processor, real-time clock, and diagnostic circuitry and software. This circuitry is silicone encapsulated to improve resistance to moisture or other corrosive environmental elements.

Specifications

- Compatible with a standard 2-3/4" and 2-3/8" back set
- Lock dimensions – 8" (L) x 2-1/2" (W) x 2-5/8" (Projection)
- Door thickness ranges from 1-3/8" to 2-1/8" for standard products (Other sizes can be accommodated by special request.)
- Escutcheon – 8" x 2-1/2"

Confidant MT™ is ideal for upgrading existing mechanical locking systems or for improved back-of-house controls.

Options

There are also two lever options: Continental and Tubular.

Continental is only available with the 4" rose plate and escutcheon, in a 26D finish.

Tubular is only available with the 3" rose plate and escutcheon, in 26D and US4 finishes.
